

Costa Blanca Astronomical Society

Dr. Stuart Eves

Space Mission Concept Engineer, Surrey Satellite Technology Ltd.

Saturday 7th May at 7:00pm
Casa de Cultura, Denia

The Costa Blanca Astronomical Society is very pleased to welcome **Dr. Stuart Eves**, from Surrey Satellite Technology Ltd. as the next presenter in our series of public talks.

A fellow of the Royal Astronomical Society for more than 20 years, Dr. Eves recently received, from UK astronaut Tim Peake, the Arthur C. Clarke award in recognition of his services promoting the science of Astronomy.

“The Future is out of this World”

With ever advancing satellite technology, space exploration is reaping the rewards of both the quantity and quality of information made available about the state of our planet and other worlds while helping us to unlock the secrets of the Universe. So, will advanced robotic satellites and probes make the need for manned space missions a thing of the past?

Dr. Eves will explain the technologies involved and how these will impact the future of space exploration.

Everyone Welcome
